

## **FIRE ACCESS AND SERVICES ADVISORY PANEL**

### **Terms of Reference**

To advise the Heritage Council on the impact of fire safety, access, services and occupational health provisions on places of heritage significance.

To advise government bodies, local councils and building owners on ways of achieving appropriate fire safety, access, services and occupational health and safety provisions without detracting from the significance and integrity of heritage places.

To review existing legislation involving fire safety, access, services and occupational health and safety provisions in heritage places and advise the relevant authorities of their impact on these places.

To promote research into fire resistance of traditional building elements, equity of access to heritage places that will minimise the impact on significance, installation of new building services to achieve minimal impact on fabric and significance, and occupational health and safety provisions in heritage places.

To assist the Heritage Office in developing guidelines and educational material on appropriate solutions for fire safety, access, services, and occupational health and safety issues in heritage places while conserving the fabric of heritage places.
